

Name: _____

Date: _____

Volume

Solve for x. Show your work.

1. A bottle holds 299 milliliters and a container holds 258 milliliters. What is the total volume?
2. Convert 3 liters to milliliters.
3. A bottle holds 371 milliliters and a container holds 378 milliliters. What is the total volume?
4. A container holds 338 milliliters and a cup holds 286 milliliters. What is the total volume?
5. A container holds 290 milliliters and a cup holds 406 milliliters. What is the total volume?
6. Convert 5000 milliliters to liters.
7. A cup holds 245 milliliters and a glass holds 135 milliliters. What is the total volume?
8. Convert 2000 milliliters to liters.

Volume – Answer Key

1. A bottle holds 299 milliliters and a container holds 258 milliliters. What is the total volume?
557 milliliters
2. Convert 3 liters to milliliters.
3000 milliliters
3. A bottle holds 371 milliliters and a container holds 378 milliliters. What is the total volume?
749 milliliters
4. A container holds 338 milliliters and a cup holds 286 milliliters. What is the total volume?
624 milliliters
5. A container holds 290 milliliters and a cup holds 406 milliliters. What is the total volume?
696 milliliters
6. Convert 5000 milliliters to liters.
5 liters
7. A cup holds 245 milliliters and a glass holds 135 milliliters. What is the total volume?
380 milliliters
8. Convert 2000 milliliters to liters.
2 liters
